 **ACURA**
PRECISION CRAFTED PERFORMANCE

PRECISION CRAFTED PERFORMANCE

It's an exceptional design standard reinforced with next-level precision, all in support of the single most important element of every Acura: the driver.

Performance is in our DNA, and we believe it's best achieved when driver and machine work together as one. When the car responds instantly and instinctively to the driver. When you can feel your control over the road. The rush. The exhilaration. The sensation of feeling simultaneously one with the car and road. It's what driving was meant to be. And we offer no greater embodiment of this promise than the new 2018 Acura TLX.

TLX SH-AWD® Tech A-SPEC in Bellanova White Pearl shown.

DIFFERENT BY

DESIGN

+ + + +

From the beginning, it's been our goal to create performance vehicles with an unrivaled level of precision. Every detail is meticulously crafted down to where the tire meets the road, and it's all with the single-minded goal of designing the world's most cutting-edge, experience-boosting, driver-first performance vehicles.

EXTERIOR DESIGN

Inspired by the Acura Precision Concept, the 2018 TLX was reimagined to reflect the bold, distinctive future of Acura vehicles.

Highlighted by our new Diamond Pentagon Grille, the TLX's aggressive design is completed with a sharply sculpted front end, modern lines and a new rear bumper with dual-exhaust outlets.

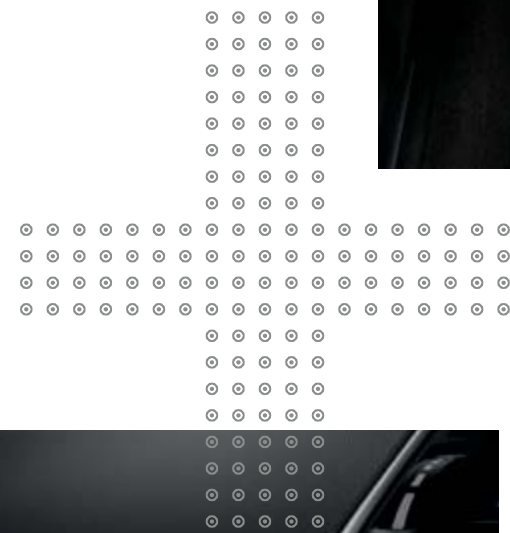

TLX Tech A-SPEC in San Marino Red shown.

JEWEL EYE™ LED HEADLIGHTS

Whether you're on the racetrack or a road trip, how far ahead you can see affects everything. Jewel Eye™ LED headlights are standard on every Acura and help to provide impressive down-road visibility with an intense, wide beam of light designed to mimic natural sunlight—the light our eyes are designed to see in. The intended result? Less fatigued driving, clarity, and more vivid colours.

TLX SH-AWD® Elite with Saddle Brown interior shown.

Dark Burl wood-finished and metal trim.

INTERIOR DESIGN

The cockpit of the 2018 TLX was fashioned to support the driver and front passenger by creating a personal sanctuary where every performance-inspired detail is deliberate and intuitive. The centre stack features two display screens—one dedicated to phone, navigation and information, and a second that is touch-friendly and controls audio and climate functions.

Available premium sport seats with contrast stitching and piping details provide ample support when cornering and comfort when cruising, while beautifully crafted surfaces and available ambient lighting create the setting for an unmatched driving experience.

A SPEC

Engineered to attack the turns, the A-SPEC Package's upgraded performance features include 19-inch Shark Gray split five-spoke wheels with road-grabbing 245-section tires, along with retuned steering and upgraded suspension.

The available A-SPEC Package takes the TLX's bolder, sportier design to another level with performance-driven details that include our signature Diamond Pentagon Grille with unique dark-chrome surround and gunmetal mesh, an aggressively re-sculpted lower front fascia, a rear bumper with a piano-black diffuser and dual oval exhaust outlets, a piano-black rear spoiler, smoked headlights and taillights, side sills, A-SPEC badging, and exclusive Still Night Blue Pearl or San Marino Red paint.

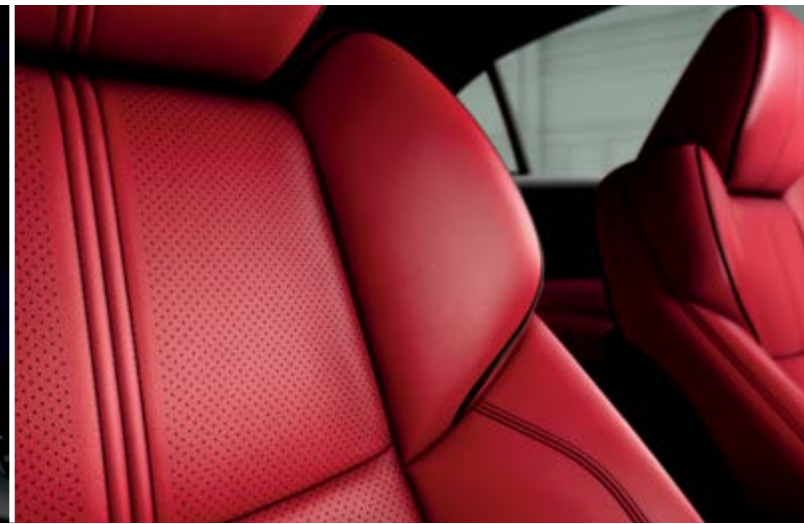

Step into the driver's seat to find either an all-red leather or Ebony leather with Alcantara-trimmed interior, sport A-SPEC seats with more aggressive side bolsters, a unique A-SPEC steering wheel, a black headliner, red accent lighting and instrumentation, brushed-aluminum metal-look trim, and A-SPEC badging.

- d. Darkened internal taillights, a piano-black decklid spoiler, and A-SPEC badging.

TAKE

CONTROL

While the TLX's available 290-hp V6 and 206-hp inline-4 definitely get it done in a straight line, the TLX was built for the corners. We believe cars should respond instantly and instinctively to the driver's input, and with innovative handling technologies such as Precision All-Wheel Steer,TM available Super Handling All-Wheel Drive,TM and Agile Handling Assist,³ the 2018 TLX has been engineered to deliver a direct connection to both car and road.

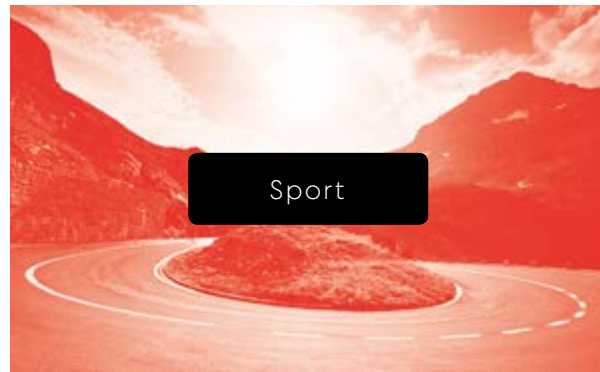

Horsepower and torque calculations reflect SAE net, Rev. 08/04, SAE J1349 procedures.

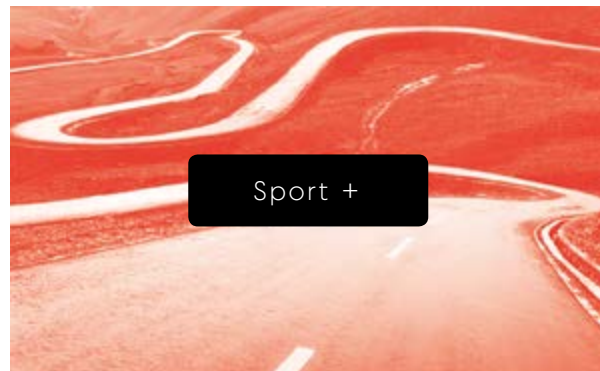

Econ

Normal

Sport

Sport +

IDS

INTEGRATED DYNAMIC SYSTEM

With Econ, Normal, Sport, and Sport+ modes, our Integrated Dynamic System (IDS) delivers four modes of Precision Crafted Performance. If you're looking to raise your pulse, Sport mode dials up throttle response and weights the steering to deliver a sports car-like feel while inciting a more aggressive response from the P-AWS or SH-AWD® systems. Sport+ pushes it further with even higher shift points and rev-matched downshifts to punctuate gear changes and help preserve balance.

And for an even more engaging experience, put full manual control of either the 8-speed dual-clutch or available 9-speed automatic transmission at your fingertips with race-inspired Sequential SportShift® paddle shifters.

TLX SH-AWD® Tech A-SPEC in Bellanova White Pearl shown.

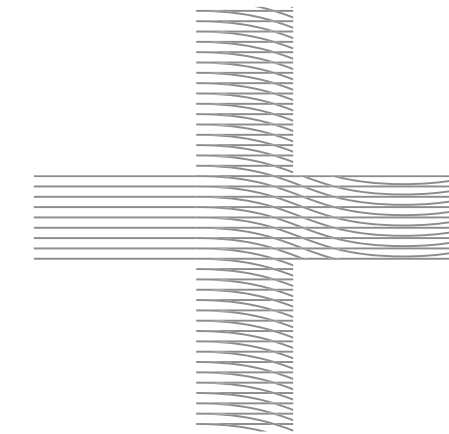

TLX SH-AWD® Elite A-SPEC in Bellanova White Pearl shown.

290-HP V6

For those looking for more exhilaration behind the wheel, the 3.5-litre i-VTEC® V6 engine paired with the smooth-shifting 9-speed automatic transmission provides up to 267 lb.-ft. of tarmac-punishing torque, helping to deliver instant power and an always dynamic driving experience.

SUPER

SONIC

206-HP 4-CYLINDER

The sporty and high-revving 2.4-litre DOHC i-VTEC® engine matched with a world's first automotive 8-speed dual-clutch transmission (DCT) with torque converter is engineered to deliver lightning-fast, yet smooth gear changes for direct and responsive performance.

Horsepower and torque calculations reflect SAE net, Rev. 08/04, SAE J1349 procedures.

P - A W S

PRECISION ALL-WHEEL STEER™

Precision All-Wheel Steer (P-AWS) takes advantage of the untapped steering potential of the rear wheels, adapting intuitively in support of the driver and responding to their inputs with constant and immediate adjustments. This intelligent system adjusts the toe angle of each rear wheel independently for increased agility and stability while cornering, changing lanes and braking, helping to deliver an exceptional level of handling precision and performance.

TWIST

TURN

AGILE HANDLING ASSIST®

Agile Handling Assist uses active braking to aid in the accurate tracing of your desired line through a turn. The system is designed to brake individual wheels as needed, effectively using brake torque vectoring to directly control the vehicle's rotation, helping to deliver a more intuitive handling experience.

TLX SH-AWD® Tech A-SPEC in Bellanova White Pearl shown.

A DIRECT
CONNECTION
BETWEEN
DRIVER
AND CAR

TLX SH-AWD® Tech A-SPEC in Still Night Blue Pearl shown.

SH-AWD®

SUPER HANDLING ALL-WHEEL DRIVE™

Super Handling All-Wheel Drive™ was designed to adapt to the driver for superb handling under virtually any condition. This innovative torque-vectoring system sends power to the wheels that need it most, distributing power from front to back, or side to side on the rear wheels, helping to match driver input, weight distribution and available traction. In a corner, the system sends up to 100 percent of the rear power to the outside wheel, effectively rotating the car and significantly enhancing manoeuvrability and control. This performance technology helps to provide seamless power transitions and remarkable control—control that goes beyond traction and forms a direct connection between driver and car.

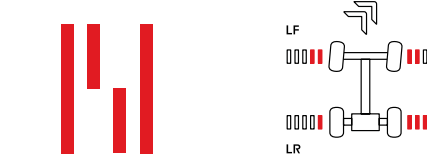

TLX SH-AWD® Elite in Obsidian Blue Pearl shown.

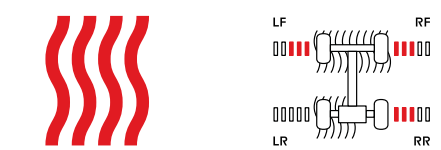

CORNERING

When cornering on dry surfaces, up to 70 percent of the torque is distributed to the rear. Torque vectoring allows up to 100 percent of that power to be distributed to the outside rear wheel, improving control and helping rotate the TLX through the turn.

LANE CHANGE

For increased stability during lane changes, the SH-AWD® system is designed to transfer power to the inside rear wheel.

SLIPPERY ROAD

Under slick conditions, SH-AWD® is designed to actively send power to the wheel with the most traction.

HIGHWAY CRUISE

To help with fuel efficiency, up to 90 percent of the power is sent to the front wheels when cruising in a straight line.

STREET

SMART

+ + + +

Safety is always a priority, and the 2018 TLX was built with that belief in mind. That's why it comes chock-full of leading-edge safety features such as our ACE™ body structure and standard AcuraWatch™ advanced safety and driver-assistance technology.

TLX SH-AWD® Elite in Bellanova White Pearl shown.

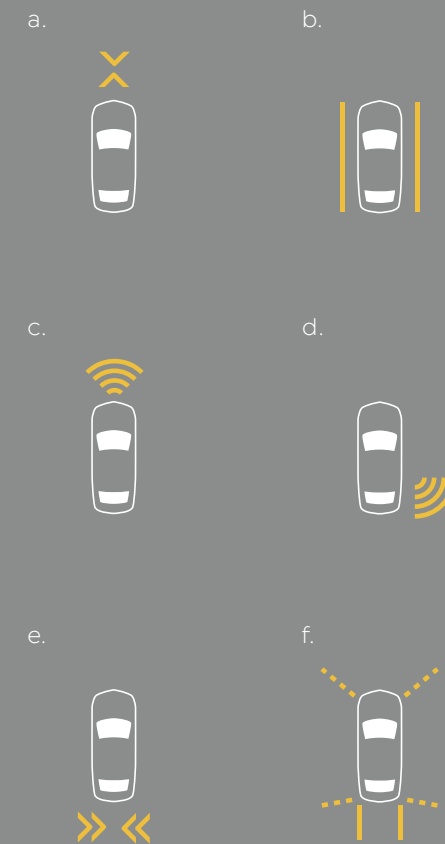

TLX SH-AWD® Elite in Obsidian Blue Pearl shown.

AcuraWatch™

Standard on the TLX, our AcuraWatch™ suite of advanced safety and driver-assist technologies is a network of systems designed to increase awareness and support the driver, working to help prevent, mitigate and in some cases even avoid impacts. Sensors are designed to continuously monitor the vehicle's surroundings and can warn of potential threats, provide steering input to help keep you in the centre of a detected lane, help apply brake pressure to maintain a set interval from cars ahead and even emergency-brake in some cases to help avoid or mitigate the risks of frontal collisions.

In addition, our available Surround view camera system[§] is engineered to give you a 360-degree view of the space around the TLX[®]. With six unique camera views, parking sensor information and dynamic guidelines that show your expected path, you'll feel more connected to your surroundings than ever before.

- a. Forward Collision Warning (FCW) system[§]
Collision Mitigation Braking System™[§] (CMBS[®])
- b. Lane Departure Warning (LDW) system[§]
Lane Keeping Assist System[§] (LKAS)
Road Departure Mitigation (RDM) system[§]
- c. Adaptive Cruise Control (ACC)
with Low-Speed Follow (LSF)[§]
- d. Available Blind Spot Information (BSI) system[§]
- e. Available Cross Traffic Monitor system[§]
- f. Multi-angle rearview camera
with dynamic guidelines[§]
Available surround view camera system[§]

[§]When travelling at speeds of 12 km/h or less.

ACE™ BODY STRUCTURE

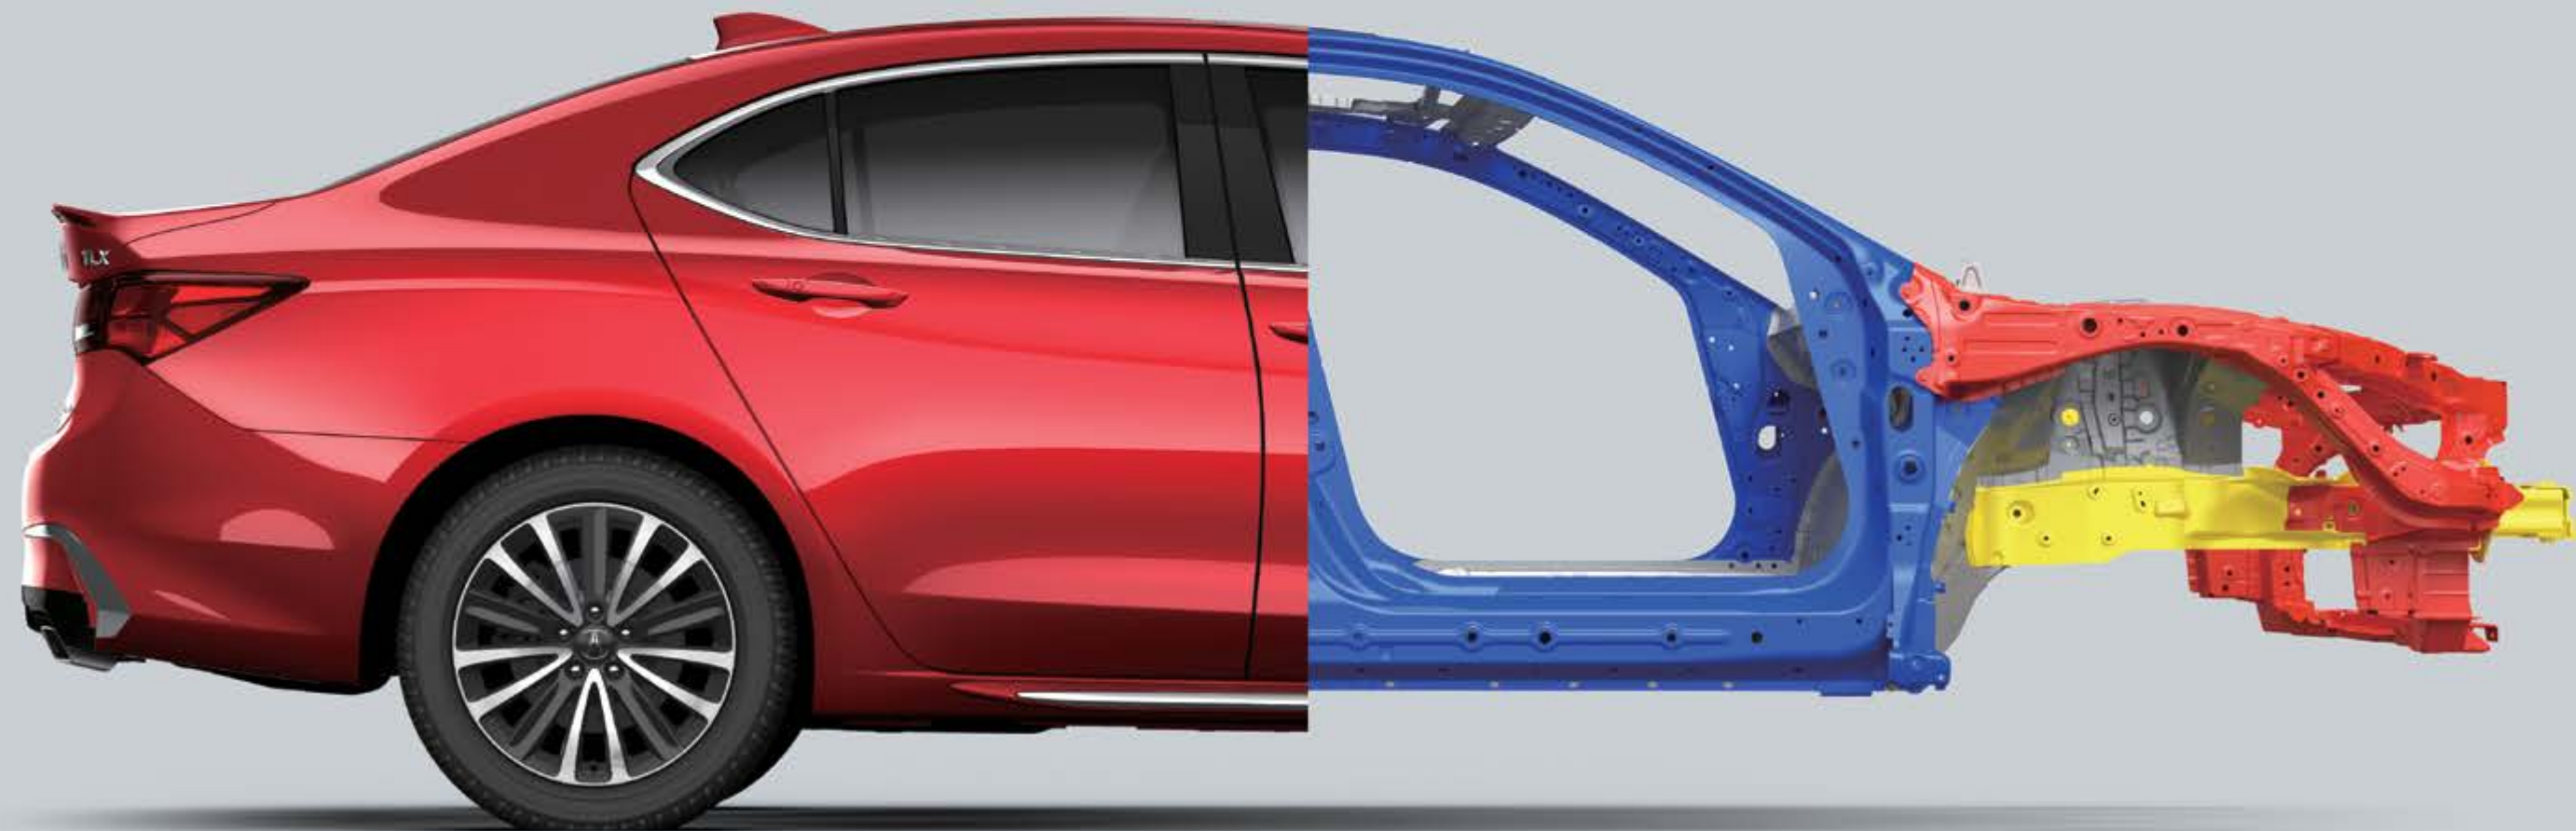

Acura's Advanced Compatibility Engineering™ (ACE™) body structure is designed to help absorb and disperse frontal impact energy so less force is transferred to what really matters: the people inside. But we didn't stop there. Crash compatibility is designed into the structure as well, so in the event of a frontal collision, the occupants of all vehicles involved may be better protected.

ACE™ incorporates extra bracing at the front corners (yellow) designed to absorb and distribute impact energy from narrow-offset collisions to the primary crash structure.

The outer braces (red) are designed to transfer impact load toward the centre of the frame, where the energy can be distributed around the cabin area more evenly.

This enhanced frontal-crash-energy management helps reduce the forces transferred to the reinforced cabin (blue) and can help to more evenly disperse the forces transferred to other vehicles in a collision.

STRUCTURED FOR ADDED SAFETY

U.S. model shown.

U.S. model shown.

+ + + +

Technology bridges the gap between car and driver—and not technology for technology's sake—to enhance the driving experience. Our definition of performance extends beyond traditional standards, encompassing ergonomics, sound, advanced connectivity, and comfort, and with available features such as ventilated front seats, wireless device charging, four-door smart entry and a heated steering wheel, it can be felt the moment you climb into the TLX's driver's seat.

STAY

CONNECTED

KEEP CHARGING

Cut the cord with the TLX's available wireless charge pad, compatible with Qi-enabled phones and cases, and keep your device powered up when on the go.

ELS STUDIO® PREMIUM AUDIO SYSTEM

To build something truly remarkable, you need to work with the best, which is why we collaborated with eight-time Grammy Award®-winner Elliot Scheiner to create the critically acclaimed ELS Studio® Premium Audio System. ELS Studio® was designed to produce music as it's meant to be heard, so even the most familiar tunes will become a whole new listening experience. The result is an exceptional combination of engineering and artistry, and it's totally unique to Acura. Yet another example of Precision Crafted Performance.

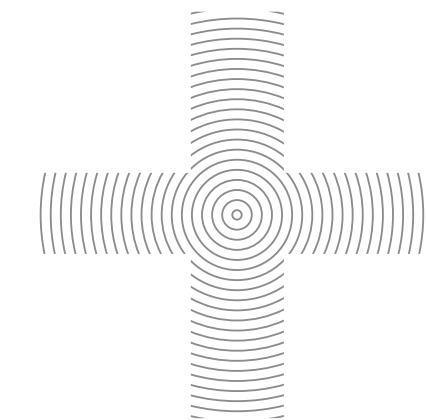

TLX SH-AWD® Elite shown.

ON-DEMAND MULTI-USE DISPLAY™

The On-Demand Multi-Use Display™ helps to provide what you need right at your fingertips. An easy-to-use and intuitive seven-inch touchscreen, On-Demand Multi-Use Display™ consolidates the controls and information you may need at any given moment, including audio, climate control and phone.

TECH

TUNES

APPLE CARPLAY™ AND ANDROID AUTO™

The TLX supports both Apple CarPlay™ and Android Auto™, helping to keep you connected to your compatible smartphone, including maps, texts, emails, music and more, all seamlessly integrated into your TLX's touchscreen display, so you can stay focused on the road.

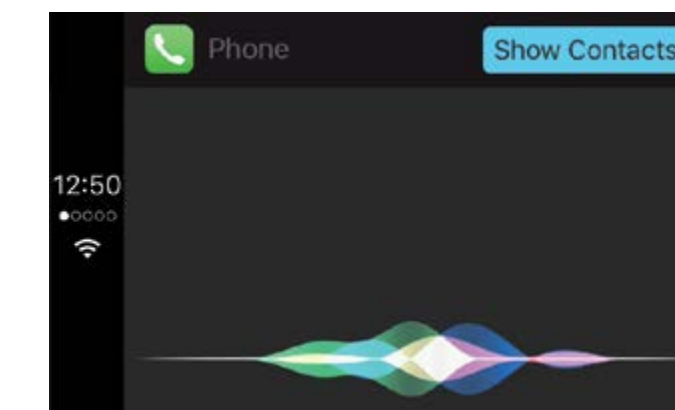

ANDROID AUTO™

Android Auto™ brings the Android experience to your car by projecting some of your favourite apps and services right into the TLX's touchscreen display, and it's highlighted by an intuitive interface that populates suggested directions, upcoming appointments and weather conditions, to name a few. The powerful new Talk to Google voice feature allows you to access directions via Google Maps, send and receive text messages and access your favourite music, providing an easier way to get the information you need, when you need it.

APPLE CARPLAY™

Place the power of your iPhone® in your dash with Apple CarPlay™. A redesigned OS seamlessly integrates your compatible iPhone with the car's built-in display and controls, so you can make calls, access your music, send and receive messages, get directions, seamlessly tap into the power of Siri with the press of a button with Siri® Eyes Free, and more.

ACURALINK™

It's not enough to simply be connected anymore. Available AcuraLink™ is designed to seamlessly connect you to the information and assistance you demand. Find nearby restaurants and points of interest while driving with the assurance of AcuraLink™ Assist services. Concierge Link puts personal assistants at your fingertips, so you can purchase airline tickets, book a hotel, or make dinner reservations, helping to ensure that all your journeys go off stress-free. And if traffic backs up, AcuraLink™ Real-Time Traffic™ with Traffic Rerouting™ helps to pull highway and surface-street information, including traffic flow, incidents and construction, and can thoughtfully reroute you for a faster commute.

ACCESSORIES

Choose from an array of Acura Genuine Accessories that give you the practical luxuries and advanced styling that will bring you together with your machine.

PROTECTION PACKAGE

All-season floor mats
Cargo tray
Rear splash guards

Interior accent lighting, red
Metallic foot rest pedal
Power thigh extension
Trunk spoiler, black
(A-SPEC Package does not feature headlamp washers)

§ None of the features we describe are intended to replace the driver's responsibility to exercise due care while driving. Drivers should not use handheld devices or operate certain vehicle features unless it is safe and legal to do so. Some features have technological limitations. For more comprehensive product and feature information, limitations and restrictions, please visit www.acura.ca/disclaimers and refer to your vehicle's Owner's Manual

† Only available in certain areas. Includes a no-charge trial of three months, beyond which service fees apply.

‡ For optimal tire wear and performance, tire pressure should be checked regularly with a gauge. Do not rely solely on the monitor system. The system cannot monitor the pressure of the spare tire.

‡‡ Map Database of the Acura Navigation System covers major metropolitan areas in Canada and the 48 contiguous U.S. states. For a list of current, detailed coverage areas, refer to the Acura website, www.acura.ca.

* Estimated fuel consumption based on Government of Canada's 5-cycle testing method. Your actual fuel consumption will vary based on driving habits and other factors – use for comparison only. For more information on 5-cycle testing, visit <http://vehicles.nrcan.gc.ca>

** Only compatible with certain devices and operating systems. Devices, cables and adapters are not included and must be purchased separately. Cellular data and/or voice charges may apply, including roaming charges and/or other amounts charged by your wireless carrier.

*** HomeLink® can be programmed with codes of up to three remote-control devices (e.g., garage-door opener, home security system, etc.). Additional control devices not provided by Acura may be required.

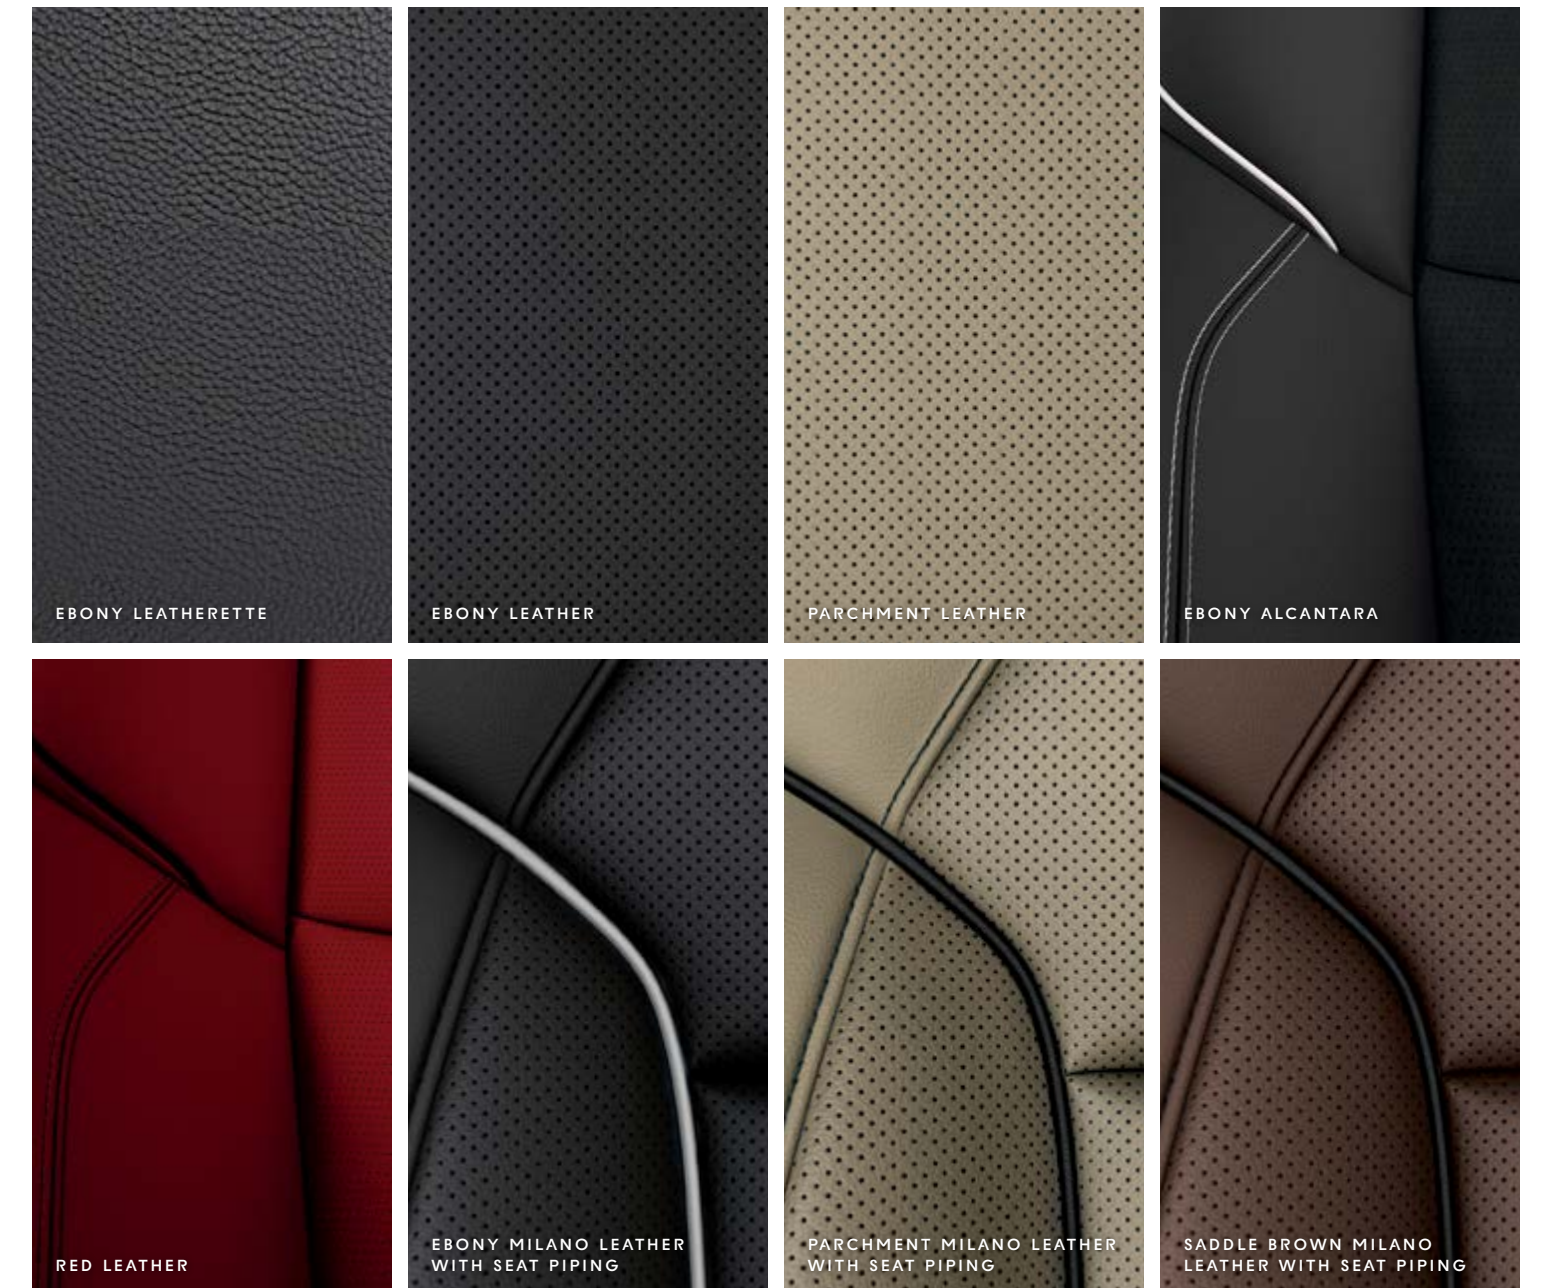

Δ Subscription required. One year complimentary subscription to AcuraLink Standard, AcuraLink Connect, and AcuraLink Premium included, after which fees, taxes and other charges will apply in order to continue subscription. The availability of certain cellular networks is required for AcuraLink to operate properly. Service interruptions may occur and/or vehicle system upgrades may be required if cellular network availability is compromised. Ask your dealer for full terms and conditions.

COLOUR & TRIM

Our colour and trim range is an extension of our commitment to craftsmanship and elegance. A palette of timeless exterior colours is complemented by equally refined interior options and a superior grade of leather, Alcantara, and leatherette trims. These are the finishing touches that elevate your relationship with your Acura, and the road, at every turn.
