

2017

MIDEX

The drive to move forward. It defines us. Realizing the full potential of this desire, however, requires more than effort.

It requires focus. Direction. A guiding principle.

For Acura, this has always been Precision Crafted Performance. It's at the heart of everything we do, and it's in every detail of the new 2017 MDX. From the bold new Diamond Pentagon grille to the groundbreaking technology in the MDX Sport Hybrid, to the new 6-passenger option with luxurious second-row captain's chairs, the MDX is pure progress for SUVs, and for drivers.

PRECISION CRAFTED
PERFORMANCE

SPORT HYBRID

THE SUV WITH SUPERCAR DNA

Simply put, Precision Crafted Performance is in its genes. The MDX is forged from innovations found in the iconic NSX supercar, including revolutionary Sport Hybrid technology and torque-vectoring Super Handling All-Wheel Drive™ (SH-AWD®§). What has gone into the NSX has proven to be a catalyst for increased performance in the 2017 MDX Sport Hybrid.

PRECISION AT EVERY TURN SPORT HYBRID SH-AWD®

The 2017 MDX Sport Hybrid augments Acura's already remarkable Super Handling All-Wheel Drive™ system with three hybrid-electric motors – one powering the front wheels, and a Twin Motor Unit (TMU) providing power to the rear wheels. This allows torque to be dynamically distributed to each of the rear wheels, producing straight-line performance and cornering precision unmatched by conventional all-wheel drive systems.

§None of the features we describe are intended to replace the driver's responsibility to exercise due care while driving. Drivers should not use handheld devices or operate certain vehicle features unless it is safe and legal to do so. Some features have technological limitations. For additional feature information, limitations and restrictions, please visit www.acura.ca/disclaimers and refer to the vehicle's owner's manual.

DESIGN

THE FACE OF
PRECISION
CRAFTED
PERFORMANCE

Commanding front styling announces the new face of Acura – the bold Diamond Pentagon grille. Strong lines are accentuated by front all-LED lighting, which provides a sleek and sophisticated design detail as well as helps to increase safety. Along with an exposed dual-exhaust, the striking exterior of the restyled MDX announces Precision Crafted Performance.

ALL-NEW 20" WHEELS

The sporty yet elegant exterior features available 20-inch alloy wheels, which complement a new chrome rocker panel design to provide enhanced contrast to the MDX's profile.

INTERIOR DESIGN

Sophisticated new design touches inside the MDX underscore its premium pedigree. Sculpted seats with chic piping and contrast stitching strike a sporty yet unmistakable luxurious tone, while natural wood accents of handcrafted wood extend sophisticated elegance all around you.

JEWEL EYE™ LED HEADLIGHTS

Acura's signature Jewel Eye headlight system presents an array of lighting with a total of ten separate high-intensity LED lamps and utilizes ultra-reflective optical lenses to provide brighter, whiter and more powerful, down-the-road illumination. The striking visual impact with precise focus allows the driver to see further than regular halogen bulbs. Plus, LED fog lights are part of the Elite Package, adding even more light to the visual impact.

PERFORMANCE

PERFORMANCE DRIVEN

A direct-injected, 3.5-litre, i-VTEC® V6 engine with Variable Cylinder Management.® It's a response to those who think utility comes at the expense of exhilaration. The 2017 MDX defies conventional thinking and delivers responsive acceleration at your command.

9-SPEED SEQUENTIAL SPORTSHIFT® WITH PADDLE SHIFTERS

The Sequential SportShift® 9-speed automatic transmission puts precision control in the hands of the driver. More gears allow for the engine to operate at peak performance for optimal acceleration. Paddle shifters allow you to select your gear, adding an exhilarating element of manual control to the drive.

INTEGRATED DYNAMIC SYSTEM

The Integrated Dynamic System (IDS) is designed to allow the MDX to complement the personality of its driver. Choose between Normal, Sport and Comfort modes and the Integrated Dynamic System will adjust the steering effort, throttle response, SH-AWD,® even the sound of the engine, to match the mood you want to set for the drive ahead.

VARIABLE CYLINDER MANAGEMENT®

Variable Cylinder Management is engineered to help the MDX realize improved fuel efficiency by automatically changing the V6 engine to run on six or three cylinders, depending on driving conditions. The cylinder activation is designed to be seamless and not felt by driver or passengers.

§ None of the features we describe are intended to replace the driver's responsibility to exercise due care while driving. Drivers should not use handheld devices or operate certain vehicle features unless it is safe and legal to do so. Some features have technological limitations. For additional feature information, limitations and restrictions, please visit www.acura.ca/disclaimers and refer to the vehicle's owner's manual.

HANDLING

PRECISION TUNED

A fully independent front and rear suspension helps the MDX deliver reactive handling of a high performance vehicle and the smooth ride quality of a luxury SUV. Track-tested and tuned, the MDX is prepared for virtually anything you'll face on the road.

SH-AWD[§]

Acura's groundbreaking Super Handling All-Wheel Drive™ (SH-AWD) system continues to be the core of the MDX's handling capability. Standard on every MDX, performance-oriented SH-AWD is designed to sense driving conditions and react accordingly by sending up to 70% of the torque to the rear wheels, from where it can then be sent to each individual rear wheel that has the most traction. This system inspires confidence, no matter what the driving intention or the road condition.

AGILE HANDLING ASSIST

The MDX Agile Handling Assist system is engineered to complement the SH-AWD system by helping to improve cornering ability. In addition, it uses the components of the Vehicle Stability Assist (VSA[®]) system to further improve handling. While VSA brakes individual wheels to avoid oversteer or understeer, Agile Handling Assist uses active braking—usually on an inside wheel—to help you smoothly and easily trace the desired line through a curve.

AMPLITUDE REACTIVE DAMPERS

Also featured on the MDX are Acura's Amplitude Reactive Dampers, which include one internal spring to absorb road irregularities and a second stiffer spring to control larger body movements.

§ None of the features we describe are intended to replace the driver's responsibility to exercise due care while driving. Drivers should not use handheld devices or operate certain vehicle features unless it is safe and legal to do so. Some features have technological limitations. For additional feature information, limitations and restrictions, please visit www.acura.ca/disclaimers and refer to the vehicle's owner's manual.

MDX Elite 6 Passenger Package shown.

INTERIOR

COMFORT CRAFTED

The cabin of the MDX is shaped by intelligent design, refined style, and human-centred technology. Drivers and passengers will be welcomed on board with soft leather-trimmed seating and available genuine wood trim, along with ample legroom and advanced noise reduction. The result is a spacious, versatile and comfortable environment that ensures a pleasant trip.

6 PASSENGER OPTION

All new for 2017, available second-row captain's chairs in the 6-passenger configured Elite Package invite passengers to experience the luxury of front-row seating. Complete with centre console, the ergonomically crafted seats keep riders in ultimate comfort through every curve.

CARGO CONSIDERATIONS

With the flexibility of 60/40 split second-row and 50/50 split third-row seatbacks, the MDX adapts to a variety of passenger and cargo combinations. Behind the third-row lies 447 litres of cargo volume. Fold the second- and third-row for 2,575 litres of pure storage bliss.

SILENCE IS GOLDEN

A quiet ride made even quieter through innovation. Acura's Active Noise Control system cancels out engine noise by countering it with opposing sound frequencies emitted from the sound system. Active Sound Control smooths out the sound created by the engine itself as it goes through its full rpm cycle. Acoustic glass, expanding body sealers and a noise-reducing underbody liner round out the MDX's cocoon—making it as composed as it is confident.

CUSTOM CLIMATE

A sense of personal comfort is all-encompassing in the MDX. The synchronized tri-zone automatic climate control with air-filtration keeps driver, front passenger and 2nd-row zones each at their own desired temperature. Available ventilated front seats offer warm-weather comfort while the standard heated front seats and available heated 2nd-row seats deliver additional cold-weather relief.

ONE TOUCH WALK-IN

Simply press the illuminated One Touch Walk-In button and the 2nd-row seats automatically fold and slide to their most forward position to provide easier 3rd-row access. A four-position recline and extended slide capability on the 2nd-row seats also allows optimal balance between 2nd- and 3rd-row legroom.

INTERIOR

HIGH FIDELITY

SOUND

The 2017 MDX features a powerful audio system, with an available Acura/ELS Surround® Audio System capable of delivering up to 546 watts of enriched audio from an array of sources, including tuner, MP3, auxiliary input jack and USB devices. All fed through your choice of a 10 to 12 speaker configuration and controlled with the 7-inch On-Demand Multi-Use Display™ – making driver and MDX more in tune.

VISION

The Technology Package features an Acura DVD Entertainment System with a 9-inch display, wireless headsets with personal surround sound, integrated remote control and an auxiliary 2nd-row audio/video input jack. The Elite Package is equipped with an ultra-wide, 16.2-inch split screen display with HDMI® compatibility, perfect for connecting compatible video devices and gaming consoles.

ACURAWATCH™ SITUATIONAL AWARENESS

FORWARD COLLISION WARNING (FCW)[§] SYSTEM

The Forward Collision Warning system uses an onboard camera that monitors the gap between you and the vehicle in front of you. If that gap begins to close too quickly, the system is designed to use both audible and visual warnings to inform you to reduce your speed.

COLLISION MITIGATION BRAKING SYSTEM™ (CMBS)[§]

Innovation that's designed to allow the MDX to react the way you would, even when you don't. The Collision Mitigation Braking System (CMBS) uses a radar transmitter to determine the distance and closing speed of objects directly in front of you and is designed to react accordingly when a programmed threshold is exceeded. Initially, the system warns you with audio and visual alerts. If speed is not reduced, the system is engineered to automatically begin light braking. If the system still determines an impact is unavoidable, it is designed to automatically apply strong braking to help reduce speed and mitigate the force of the collision.

ADAPTIVE CRUISE CONTROL (ACC) WITH LOW-SPEED FOLLOW[§]

The MDX has taken the conventional cruise control system and enhanced its benefits for the driver. Using an advanced radar system hidden discretely behind the front grille, the Adaptive Cruise Control with Low-Speed Follow system is engineered to allow the MDX to independently follow the vehicle in front at a set distance, starting and stopping appropriately with the flow of traffic.

LANE DEPARTURE WARNING (LDW)[§] SYSTEM

Should the MDX begin to drift out of its lane without a turning signal being applied, the Lane Departure Warning system is designed to trigger both an audible and visual warning to alert the driver. This connection between vehicle and road is achieved through an onboard camera that is designed to monitor the vehicle's lane position at all times.

LANE KEEPING ASSIST SYSTEM (LKAS)[§]

The Lane Keeping Assist System builds on conventional lane departure systems to work proactively to help keep the vehicle inside the lane during normal driving conditions. If the vehicle begins to cross lane markings unintentionally, it's engineered to apply light steering torque to return the vehicle to the centre of the lane while a continuous beep alerts the driver.

ROAD DEPARTURE MITIGATION[§]

With camera technology, Road Departure Mitigation can sense more than just lane markings—it has been engineered to detect parked vehicles, pedestrians, mailboxes, and other objects. It is designed to help steer and even apply brake pressure when necessary to keep the vehicle from leaving the road.

BLIND SPOT INFORMATION (BSI)[§] SYSTEM

Using ultrasonic sensors in the rear bumper, the available BSI system is designed to illuminate an indicator light to let you know a vehicle has been detected in your blind spot, and alerts you with an audible signal if you try to change lanes.

REAR CROSS TRAFFIC MONITOR[§]

Using the blind spot information sensors designed to detect vehicles as the MDX is put in reverse, the available Rear Cross Traffic Monitor is engineered to sound a warning and display a visual warning on the rearview camera display if a vehicle is detected. Like having eyes on the back of your head, the system often detects vehicles before you can even see them as you reverse.

§ None of the features we describe are intended to replace the driver's responsibility to exercise due care while driving. Drivers should not use handheld devices or operate certain vehicle features unless it is safe and legal to do so. Some features have technological limitations. For additional feature information, limitations and restrictions, please visit www.acura.ca/disclaimers and refer to the vehicle's owner's manual.

TECHNOLOGY

A SENSE OF PERSONAL SPACE

KEYLESS SMART ENTRY

The MDX adjusts itself to your preferences before you even open the door. In addition to granting you the comfort and convenience of leaving your keys in your pocket, your personal key fob remembers your settings for adjusting the driver's seat, mirror, steering wheel column and cabin temperature. With a second key fob, an additional driver can enjoy their own personalized experience.

FINGERTIP CONTROL

A host of available controls intuitively integrated with the steering wheel places powerful functionality at your fingertips: audio control, remote calling, and temperature adjustment. A long press of the voice control button initiates Siri® Eyes Free, enabling voice commands and full Siri functionality with a compatible iPhone.

REMOTE CONTROL

The standard bi-directional key fob allows you to communicate with your MDX. When you send a request to your MDX – lock, unlock, rear liftgate open, or engine start – LEDs will light up on the fob confirming that the request was received. The standard remote engine starter will automatically set the MDX's interior temperature in both hot and cold weather conditions, activating air conditioning when hot, and turning on heat, driver's seat heaters, heated steering wheel, and all external defrosters when cold.

SURROUND VIEW CAMERA SYSTEM[§]

The multi-angle rearview camera with guidelines comes standard on the MDX. Elite models are upgraded with a surround view camera system that is designed to assist you in checking a variety of blind spots when travelling at 12 km/h or less. Using four separate cameras, views of behind, directly in front of, and both front sides of your MDX can be displayed on the navigation screen. The system can also combine all four camera angles together to create a composite 360-degree view of the area around your MDX. In addition, dynamic guidelines on the screen help you assess the distance between objects and see your projected path of travel.

§ None of the features we describe are intended to replace the driver's responsibility to exercise due care while driving. Drivers should not use handheld devices or operate certain vehicle features unless it is safe and legal to do so. Some features have technological limitations. For additional feature information, limitations and restrictions, please visit www.acura.ca/disclaimers and refer to the vehicle's owner's manual.

ACURALINK™ DIGITAL PRECISION. HUMAN CONNECTION.

Available to MDX drivers is the AcuraLink^{§*Δ} connectivity system, which adds convenience and luxury to the driving experience. Through embedded two-way communications and web-enabled devices, AcuraLink brings human and vehicle ever closer in the MDX.

An On-Demand Multi-Use Display™ touchscreen and one-touch dedicated Link and Assist buttons in the vehicle easily give you access to an array of customizable media, convenience features, emergency services and even 24-hour live concierge operators. The AcuraLink^{§*Δ} Connect app and MyAcura website allow you to connect remotely with your MDX for ultimate convenience.

NAVIGATION

AcuraLink brings some impressive additions to your Acura Navigation System like Real-Time Traffic™** with surface street traffic information. Depending on your location, you'll also be able to request points of interest via a live concierge agent and have the route sent directly to your navigation screen. Or map locations yourself and upload them to your screen via the MyAcura website, or AcuraLink Connect app.*

ENTERTAINMENT

The MDX with AcuraLink features Aha™ by Harman, a cloud-based interface that provides you with thousands of customizable media and connectivity choices. The AcuraLink® Streams app featuring Aha lets you access your desired content on the go. Once you have selected your favourite stations, you can connect compatible iOS or Android smartphones with your MDX through your on-board touchscreen and have immediate access to your favourite internet content, including personalized music, internet radio, podcasts, audiobooks, location-based searches and even have your Facebook® and Twitter® feeds read out loud as you drive.

REMOTE CONTROL

With the AcuraLink^{§*Δ} Connect app, or MyAcura website, you no longer need to be in your MDX to connect with it. Using your web-enabled device, you can remotely lock and unlock doors; use the vehicle finder feature in a crowded lot; even check things such as fuel level, tire pressure and odometer reading from your virtual dashboard. And the connection goes both ways as your MDX can send messages to you via the mobile app, alerting you of an alarm notification for example, even if you're out of town.

EMERGENCY

In the event of an airbag deployment, AcuraLink^{§*Δ} is engineered to automatically send a signal for immediate assistance to your location.† The on-board one-touch Assist button also gives you access to live operator assistance in the case of non-collision emergencies.

MAINTENANCE

Not only will you be notified when your next service is due via the Maintenance Minder,™ but the Automated Appointments™ feature allows you to schedule an appointment with your favourite, or local, Acura dealer directly through the AcuraLink^{§*Δ} system.

LIVE CONCIERGE

The AcuraLink^{§*Δ} Premium package gives you access to the most personalized feature of all—access to live concierge agents. One touch puts you in direct voice contact with an Acura concierge who will assist you with virtually anything from finding a point of interest; booking dinner, hotel, or flight reservations; even searching the web for answers for you while you drive.

§None of the features we describe are intended to replace the driver's responsibility to exercise due care while driving. Drivers should not use handheld devices or operate certain vehicle features unless it is safe and legal to do so. Some features have technological limitations. For additional feature information, limitations and restrictions, please visit www.acura.ca/disclaimers and refer to the vehicle's owner's manual.

*Only compatible with certain devices and operating systems. Cellular data and/or voice charges may apply, including roaming charges and/or other amounts charged by your wireless carrier.

ΔSubscription required. One year complimentary subscription to AcuraLink Standard, AcuraLink Connect, and AcuraLink Premium included, after which fees, taxes and other charges will apply in order to continue subscription. The availability of certain cellular networks is required for AcuraLink to operate properly. Service interruptions may occur and/or vehicle system upgrades may be required if cellular network availability is compromised. Ask your dealer for full terms and conditions.

**Real-Time Traffic™ is only available in 13 of Canada's largest metropolitan areas and is dependent upon data location reporting of connected vehicles.

†Vehicle or the compatible smartphone tethered via the vehicle's HandsFreeLink Bluetooth connection needs to have cellular reception.

MDX drivers and passengers are surrounded by an extensive number of both standard safety features and available innovative Acura safety technologies, further enhancing the driving experience through greater peace of mind.

VEHICLE STABILITY ASSIST (VSA)[§]

The advanced co-operative Vehicle Stability Assist (VSA) system with Traction Control is engineered to automatically detect and correct understeer or oversteer situations, sometimes before you're even aware there's a problem. The system intuitively analyzes the conditions and is designed to then reduce throttle and/or apply braking to individual wheels. Should a loss of traction occur on a slippery surface, Traction Control is engineered to help compensate to get you safely underway.

ANTI-LOCK BRAKES

The Anti-lock Braking System (ABS)[§] helps you maintain steering control when braking hard on wet, slippery or loose surfaces, while Electronic Brake-force Distribution (EBD) balances braking forces at each wheel to help compensate for cargo and passenger weight distribution inside the cabin.

AIRBAGS

A significant level of safety is achieved with seven standard airbags. The MDX cabin features side curtain airbags with a sensor engineered to deploy in the event of a rollover, dual-stage, multiple-threshold front airbags (SRS) and SmartVent™ side airbags.

ACE™ BODY STRUCTURE

The innovative Advanced Compatibility Engineering™ (ACE) body structure adopts a high-tensile, high-efficiency steel body structure to help provide enhanced protection from a multi-directional collision. ACE reduces the concentrated force of a frontal impact by absorbing energy over a large area and dispersing it away from the occupants of the cabin. Additionally, ACE is designed to help reduce occupant injuries caused by misalignment in collisions between vehicles of different sizes.

TIRE PRESSURE MONITORING SYSTEM[†]

To enhance your peace of mind, the Tire Pressure Monitoring System (TPMS) continually monitors each tire and displays the precise pressure of each individual tire in the instrument panel. If a tire loses pressure, a warning appears, indicating the specific tire that requires attention. When filling a tire, the new tire fill assist feature notifies you with an audible alert when the recommended tire pressure is met, reducing the amount of time you have to spend outside your MDX on cold wintry days.

[§] None of the features we describe are intended to replace the driver's responsibility to exercise due care while driving. Drivers should not use handheld devices or operate certain vehicle features unless it is safe and legal to do so. Some features have technological limitations. For additional feature information, limitations and restrictions, please visit www.acura.ca/disclaimers and refer to the vehicle's owner's manual.

[†] For optimal tire wear and performance, tire pressure should be checked regularly with a gauge. Do not rely solely on the monitor system.

COLOUR & TRIM

Our colour and trim range is an extension of our commitment to craftsmanship and elegance. A palette of timeless exterior colours is complemented by equally refined interior options and a superior grade of leather trims. These are the finishing touches that elevate your relationship with your Acura, and the road, at every turn.

ACCESSORIES

Choose from an array of Acura Genuine Accessories that give you the practical luxuries and advanced styling that will bring you together with your machine.

PROTECTION PACKAGE

All-season floor mats
(includes 1st and 2nd row mats)
Cargo tray, folding

PROTECTION PACKAGE – ADVANCE

All-season floor mats
(Includes 1st, 2nd and 3rd row mats)
Cargo tray, folding

UTILITY PACKAGE

Running boards, advance
Roof rack rails

Accessories listed in the packages may also be added individually to your MDX.

SPORT LUXURY PACKAGE

Roof rack rails
Running boards, advance
LED fog lights

PLATINUM PACKAGE

20" Alloy wheel – SBC
Running boards, advance
Roof rack rails
Roof rack, crossbars

TOWING PACKAGE – 3,500 LB

Trailer hitch
Trailer hitch harness

TOWING PACKAGE – 5,000 LB

Trailer hitch
Trailer hitch harness
ATF cooler

Choose from either the 3,500 lb or 5,000 lb MDX Towing package. Your sales person will be able to help you choose depending on your individual towing needs.

ADDITIONAL ACCESSORIES AVAILABLE

Driving a luxury vehicle should go beyond engineering and amenities. That's why Acura is committed to ensuring your ownership experience is equally luxurious. New Acura owners benefit from four-year 24-hour Roadside Assistance, which includes Dispatch Emergency Roadside Service, Emergency Lockout Service and Traffic Accident Services. See your Acura Retailer for details.

WARRANTY

Your new Acura vehicle comes with the following warranties:

- Major Component – 5-year/100,000-km limited warranty
- Vehicle – 4-year/80,000-km Distributor's limited warranty
- Rust Perforation – 5-year unlimited-distance warranty
- Surface Corrosion – 4-year/80,000-km
- Accessories – 4-year/80,000-km limited warranty

(when installed by an authorized Acura Retailer at time of new vehicle delivery). Regular maintenance items and parts are subject to normal wear and replacement, and are not covered by warranty. Certain other items are excluded and certain conditions apply. See your Acura Retailer for details.

ACURA PLUS

Extend your worry-free ownership experience by purchasing additional coverage. Choose from Acura's flexible selection of Mechanical Coverage that extends up to 8 years or 200,000 km, whichever comes first. See your Acura Retailer for details.

LEASING AND FINANCING

Owning your Acura is easy. See your Acura Retailer for complete details on Conventional Financing.*

*A genuine service of Acura Financial Services. Conditions, restrictions and prepayment requirements might apply O.A.C.

Always use seat belts and appropriate child seats. Children 12 and under are safest when properly restrained in a rear seat. Properly secure all items stored in the cargo area. Always read the vehicle owner's manual for detailed vehicle operation and feature information.
